PRODUCT LITERATURE

SARAMERC-LF (CONC)

Product Information

Saramerc-LF (Conc) is a low foaming concentrated mercerising wetting agent. Addition of Saramerc-LF (Conc) in the mercerising bath ensures uniform mercerisation and hence uniform dyeing. During caustic recovery Saramerc-LF (Conc) does not lead to foaming and therefore does not interfere in recovery.

Key Features & Benefits

Key Features	Benefits
-----	-----
Low foaming	Does not interfere in caustic recovery
Good stability	Suitable for even hot mercerisation

General Characteristics

Physical appearance	: Offwhite to brownish paste
Ionic nature	: Anionic
pH of 1% solution	: 8.5 +/- 1
Miscibility	: Readily miscible with water
Compatibility	: Compatible with anionic and nonionic products
Stability	: Stable to dilute acids & caustic at mercerising concentration

Application

3-4 g/l Saramerc-LF (Conc) can be added in mercerisation bath depending upon the quality of substrate and equipment. Optimisation of concentration of Saramerc-LF (Conc) can be carried out in lab before bulk trial.

Note :

Require quantity of Saramerc-LF (Conc) to be diluted to 1:20 and diluted product to be added into concentrated alkali.

Instructions For Dilution

- Take 20 parts of product

PRODUCT LITERATURE

SARAMERC-LF (CONC)

- To this, add gradually 80 parts of water with stirring at 300-350 rpm

- Continue stirring for 30-45 min till homogeneous product is form

If particles are observed, stir well before use.

Preservation: It is recommended to add 0.1% Bronopol (2-Bromo,2-nitropropane, 1,3-diol) or Methyl Paraben (methyl para hydroxy benzoate) as an antimicrobial agent to avoid fungal / microbial growth.

Precautions

Storage : Store in cool, ventilated shed away from heat and direct sunlight.Storage temperature should not exceed 35 deg C.Close lids firmly to avoid contact with air and moisture.

Shelf Life : 8 months from the date of manufacturing, if stored under controlled conditions.
