PRODUCT LITERATURE

HELOPREP-GC

Product Information

Heloprep-GC is a novel biodegradable all-in-one product which is suitable for bleaching of cellulosic substrates and its blends. Heloprep-GC possess sequestering and peroxide stabilization properties, hence addition of sequestering agent and peroxide stabilizer is not required in treatment bath. Bleaching with Heloprep-GC exhibits very good softness, absorbency, rewetting and whiteness of bleached fabric than conventional bleached fabric. Yarn bleached with Heloprep-GC decreases the coefficient of friction, improves strength and reduces harshness to a certain extent. Suitable for Autodosing / dispensing.

Key Features & Benefits

Key Features

Low alkali during bleaching

In built sequestering peroxide stabilization

Eco-friendly

Benefits

No separate rinsing after bleaching.
Saving in water

No need to add sequestering agent or peroxide stabilizer

Low BOD/COD and TDS in effluent bath

General Characteristics

Physical appearance : Light Blue liquid
Ionic nature : Nonionic to weakly anionic
pH of 1% solution : 6.5 +/-1
Miscibility : Miscible with water
Compatibility : Compatible with anionic and nonionic products
Stability : Stable to dilute acids and dilute alkalies

Application

- Recipe for RFD (Ready for dyeing)
 - Heloprep-GC : 0.8-1.0%
 - Saracrease-HG(Conc) : 0.1%
 - Caustic flakes : 1.25-1.5%
 - Hydrogen Peroxide(50% v/v) : 2.0-2.5%

PRODUCT LITERATURE

HELOPREP-GC

Temperature : 95-98 deg.C for 30-45min.

2. Recipe for full white

Heloprep-GC : 1.2-1.5%
Saracreeze-HG (Conc) : 0.1%
Caustic flakes : 2-2.5%
Hydrogen Peroxide : 6.0-8.0%
Temperature : 95-98 deg.C for 60-75min.

Optical brightener to be dosed in hot wash OR in the same bleached bath after 50-60 min.

Precautions

Storage : Store in cool, ventilated shed away from heat and direct sunlight.Storage temperature should not exceed 35 deg C.Close lids firmly to avoid contact with air and moisture.

Shelf Life : 8 months from the date of manufacturing, if stored under controlled conditions.
