PRODUCT LITERATURE

SARASIL-D

Product Information

Sarasil-D is a silicone defoamer designed for all textile processing operations where foam control is essential. It can be used in jets, overflow machine, winches and package dyeing machine. It is not suitable for alkaline scouring, polyester weight reduction, reactive, vat and sulphur dyeing.

Key Features & Benefits

Key Features

Silicone defoamer

Versatile

Benefits

Good defoaming action

Dyeing and printing of 100% polyester in jet dyeing or soft flow machine

General Characteristics

Physical appearance : Milky white viscous liquid

Ionic nature : Nonionic

pH of 1% solution : 6 +/- 1

Miscibility : Miscible in water

Compatibility : Compatible with cationic, nonionic and anionic products

Stability : Stable to dilute acids and dilute alkalies

Application

Recommended dosage

1-2 g/l Sarasil-D

in all operations to eliminate foaming.

Precautions

Storage : Store in cool, ventilated shed away from heat and direct sunlight. Storage temperature should not exceed 35 deg C. Close lids firmly
