## PRODUCT LITERATURE

### SARAOUEST-2UD

#### Product Information

Saraquest-2UD is specially developed multifunctional auxiliary for textile wet processing.

Saraquest-2UD can be used in demineralisation of cotton during desizing as well as scouring operation.

In peroxide bleaching, it acts as preferential chelating agent for iron impurities thereby preventing catalytic damage.

In neutralisation operation, at the end of the scouring or during finishing, it also neutralises core alkali thereby maintaining the desired pH of the treated fabric.

#### Key Features & Benefits

##### Key Features

-----

Iron chelation even  
under alkalies conditins

Enzyme compatible

##### Benefits

-----

Prevents pinholes & catalytic  
damage of cotton in peroxide  
bleaching

Can be added in desizing for  
demineralisation of cotton

#### General Characteristics

Physical appearance : Colourless to pale yellow liquid  
Ionic nature : Nonionic  
pH of 1% solution : 3 +/- 1  
Miscibility : Miscible with cold water  
Compatibility : Compatible with cationic, nonionic and  
anionic products  
Stability : Stable to dilute acids, dilute alkalies

#### Application

1. In enzymatic desizing of cotton

0.5-2 g/l Saraquest-2UD

## PRODUCT LITERATURE

### SARAOUEST-2UD

#### 2. Scouring and bleaching of cotton

1-2 g/l Saraquest-2UD

#### **Precautions**

Storage : Store in cool, ventilated shed away from heat and direct sunlight.Storage temperature should not exceed 35 deg C.Close lids firmly to avoid contact with air and moisture.

Shelf Life : 9 months from the date of manufacturing, if stored under controlled conditions.
