PRODUCT LITERATURE

HEFLOR-CI (CONC)

Product Information

Heflor-CI (Conc) is a corrosive and passive inhibitor for metal when it comes in contact with water. Heflor-CI (Conc) protects during processing/dyeing of garments with metal buttons/zips, especially made up of copper. It prevents stain formation due to metal accessories. Heflor-CI (Conc) does not affect shade of dyed garments.

Key Features & Benefits

Key Features

Benefits

Protects zips/buttons

Prevents stain formation on garments

Wide pH stable

Stable from pH 3 to 13

General Characteristics

Physical appearance : Pale yellow clear liquid
Ionic nature : Nonionic to weakly anionic
pH of 1% solution : 8 +/- 1
Miscibility : Miscible with water
Compatibility : Compatible with anionic and nonionic products
Stability : Stable to dilute acids and dilute alkalies

Application

0.5-1.0 g/l Heflor-CI (Conc) to be added at room temperature before addition of dye.

Note:

1. Heflor-CI (Conc) can be directly dosed in machine
2. Heflor-CI (Conc) not to be used with chlorine-based oxidizing products
