PRODUCT LITERATURE REATHICK-919

Product Information

Reathick-919 is a sodium alginate substitute for Reactive printing on cellulosic substrates. Reathick-919 exhibit prints with high brightness, high brilliance and high permeability. Reathick-919 has excellent permeability with uniform colour yield. It gives much better and cleaner print than sodium alginate. It is suitable for both, Flat and Rotary screen printing.

Reathick-919 is a non alginate thickener.

Key Features & Benefits

Key Features Benefits

Excellent permeability High brightness, high brilliance with uniform colour yield

General Characteristics

Physical appearance Off while to creamish viscous liquid

Ionic nature Anionic pH of 1% solution 7 +/- 1

Miscibility Miscible with water

Compatibility Compatible with anionic and non-ionic products

Stability Stable to dilute acids and dilute alkalies

Application

For all Dyestuff excluding Navy Blue and Black:

Recommended recipe	<u>Cotton</u>	<u>Viscose</u>
Reactive Dye	x%	x%
Urea	5-10%	10-15%
Sod.Bicarbonate	3-3.5%	3-3.5%
Super R Salt	2%	4%
Reathick-919	3.5-5%	3.5-5%
Water	Balance	Balance

For Navy Blue and black:

Product Code: L009633.docx

•	Cotton	Viscose
Reactive Dye	6-7%	6-7%
Urea	5-10%	15-20%
Sod.Bicarbonate	3-3.5%	3-3.5%
Super R Salt	2%	4%
Soda Ash	0.5-1%	0.5-1%
Reathick-919	4-6%	4-6%
Water	Balance	Balance

PRODUCT LITERATURE REATHICK-919

Paste Preparation Method:

r dote i reparation metrio

- It is recommended to use either demineralised water (DM water) or cooled steam condensate water for preparation of paste.
- Take the reactive dyes as per recipe.
- Dissolve in water adding Urea and Super R Salt.
- Then slowly add Reathick-919 to get desired viscosity.
- Add sodium bicarbonate just before printing and if required, adjust viscosity with addition of small quantity of Reathick-919.

Note:

.____

The dosages of thickener and auxiliaries can be adjusted according to actual practice.

Precautions

Storage Store in cool, ventilated shed away from heat and direct sunlight. Storage

temperature should not exceed 35 deg c. Close lids firmly to avoid contact with air

and moisture.

Shelf Life 9 months from the date of manufacturing, if stored under controlled conditions.
