PRODUCT LITERATURE

ARKOLAN-30

Product Information

Arkolan-30 is a dye transfer inhibiting or Anti-tinting washing off agent which helps in neutralising the bled colour and prevent its redeposition on the fabric. Arkolan-30 helps in removing the gum of print paste after printing. Arkolan-30 removes the unfixed dye completely from the fabric resulting in very good wet fastness properties.

Arkolan-30 can be used in washing-off of yarn dyed shirtings.

Arkolan-30 can also be used as an additive in laundry formulations that limits the random dye re-deposition onto the fabric during the wash cycle. Arkolan-30 can be incorporated in powder detergents. It offers an excellent cost / benefit ratio in detergent formulations.

Key Features & Benefits

Key Features

Anti-tinting washing off agent

Effective dye transfer inhibition during the wash

Can be incorporated in powder detergents

Benefits

Very good wet fastness property

Increase the life time of the dyed clothes

Offers excellent cost / benefit ratio in detergent formulations

General Characteristics

Physical appearance : Light yellow viscous liquid

Ionic nature : Non ionic

pH of 1% solution : 8 +/- 1

Miscibility : Miscible with water

Compatibility : Compatible with anionic, cationic and nonionic products

Stability : Stable in dilute acid and dilute alkalies

Application

Additive in laundry formulations

Recommended dosage : 0.5-1 g/l Arkolan-30
